complete breech presentation, the frank breech presentation, the shoulder breech presentation, and the footling presentation. Veracity is being completely truthful with patients; nurses must not withhold the whole truth from clients even when it may lead to patient distress. Respiratory depression can occur as the result of narcotic analgesics such as morphine, and not NSAIDs; pneumothorax and hemothorax can occur as the result of an inadvertent perforation during invasive procedures such as the placement of a total parenteral nutrition catheter and a thoracentesis; and the signs and symptoms of a latex allergy include tachycardia, hypotension, dyspnea, chest pain tremors, and anaphylactic shock, not respiratory depression.
