Near the southern side, the sandspit is formed into several small hillocks, which, where the Moa-hunter kitchen middens are exposed, show under a capping of 3 to 4 feet of blown sands with sometimes a small layer of vegetable soil on the top, several beds of ashes, often separated by 9 to 15 inches of drift-sands. Although there is an attempt made to polish the broken surface of this tool, it is difficult to understand why it should have been buried with the body, except that it was one of the possessions of the deceased, and which he had just begun to shape into another tool.
