**Pamphlet of extracts from the 13th volume of the astronomical observations made at the Royal observatory, Edinburgh (1872 edition)**

I had, however, the comfort to know that my brother was no loser through this accident, for the remainder of the night was cloudy, and several nights afterwards afforded only a few short intervals favourable for sweeping, and until the 16th January there was no necessity for my exposing myself for a whole night to the severity of the season.

Margaret has sent the enclosed, and will be glad to hear if it is what you meant; she was writing it when you stopped at the door, but did not venture to open it for fear of disturbing us. If I have any instrument you wish to use, it is at your service. I would not affirm that there may not exist some astronomers so enthusiastic that they would not dislike to be whisked away from this low terrestrial spot into the higher regions of the heavens by the tail of a comet, and exchange our narrow uniform orbit for one vastly more extended and varied.

Then there were the two Dalrymples, both historians, and the gossipy autobiographer, Dr.

## **Memoir and Correspondence of Caroline Herschel.**

. Millar exults and brags that twothirds of the edition are already sold, and that he is now sure of success.

**Adam Smith 141020488X, 9781410204882**

From what is yet to follow, it will be seen that our next meeting was not only the last, but a very distressing one. As this reprint is from very old book, there could be some missing or flawed pages, but we always try to make the book as complete as possible. So much, by way of apology, for the emigration of part of my family to England.
