

# Stepwise elaboration of quasi-homogeneous gel networks as an approach to ultra-high load polymer-supported peptide synthesis.

The Polytechnic, Wolverhampton, School of Applied Science - Nanostructured polymer membranes. Volume 1, Processing and characterization 9781118831779, 978

Description: -

-Stepwise elaboration of quasi-homogeneous gel networks as an approach to ultra-high load polymer-supported peptide synthesis.

-Stepwise elaboration of quasi-homogeneous gel networks as an approach to ultra-high load polymer-supported peptide synthesis.

Notes: Thesis (Ph.D.) - The Polytechnic, Wolverhampton (CNAA), 1987.

## Scientific Bases for the Preparation of Heterogeneous Catalysts, Volume 175: Proceedings of the 10th International Symposium, Louvain

Extensive efforts towards optimization and derivatization of compounds via combinatorial biosynthesis and classical engineering have elucidated the modularity, flexibility and promiscuity of polyketide biosynthetic enzymes. The sodium chloride rejection was decreased by increasing feed concentration and temperature, whereas it increased with an increase in transmembrane pressure. .
