**Personal Supervision** One of the great strengths of studying at Cambridge is the level of individual support you will receive. Contributors to the book are members of the primary and secondary PGCE teams at the University of Southampton, Edge Hill University, the University of Dundee and an independent consultant supporting Higher Education Institutions. The book will help new teachers beginning to use research literature to ask questions about published work, showing that the nature of knowledge sought, and how such knowledge is justified, depends on the standpoint from which questions are asked, what sorts of answers are deemed researchable and the audience to whom results are to be addressed.

## Learning and teaching at M

This learning can focus upon both practice and theory — and, most importantly, the interplay between the two.
