The clearest outline in the mind of an instructor does not always automatically come through to students in the class - thus missing an opportunity for students to make important connections. We must provide our students with large amounts of information in a way that helps them understand, retain and remember it. Preservice teachers in this study were required to develop technology-enriched lessons within a curriculum unit that incorporated a variety of technologies appropriate to the grade level s and subject s they subsequently taught in student teaching.

Outlines and PowerPoint slides when an electronic or hard copy is given to the students prior to the lesson also fall into the category of text organizers providing students with a structured guide for filling in appropriate information, and time to also add in pertinent examples and information from class discussions as they are not spending all of their time trying to record just the most basic information.

19 Types of Graphic Organizers for Effective Teaching and Learning

There is little evidence that K-12 students used technology to support critical thinking, problem solving, and decision-making. Much of the discussion focused on moving beyond technology operations and concepts. Learning outcomes have been widely positive and highly supported with use of the types of organizers listed below.

Using Technology as a Tool for Learning and Developing 21st Century Citizenship Skills: An Examination of the NETS and Technology Use by Preservice Teachers With Their K

Vocabulary graphic organizer This tool can be used to assess the vocabulary knowledge of students.

Will new teachers be prepared to teach in a digital age? The ISTE study also revealed that teacher educators did not model the use of educational technology skills in their teaching. What are we doing to prepare future generations to thrive in this changing landscape? Upper Saddle River, NJ: Prentice Hall.

Using Technology as a Tool for Learning and Developing 21st Century Citizenship Skills: An Examination of the NETS and Technology Use by Preservice Teachers With Their K

Two key types of Advance Organizers will be addressed in this module - Expository and Comparative, along with two organizational subcategories which will be explained in more detail in the section. Additionally, students prefer Advance Organizers that have headings and subheadings so that information provided can be put into categories and easily located. There are many different kinds of graphic organizers.
