Lessons from Denmark, Action at Home

Well-marked bike lanes and a variable terrain help minimize conflicts between cyclists and other park users.

The wooden figure Panda mimics this simplicity, with the rotation of the upper body and movability of the arms and legs.

Design and Architecture: What is Danish Design?

Most recently he has been the design leader for LEGO House, which opened its doors to critical acclaim in 2017.

Converging Grounds : A Design Charrette on Density in Denmark

By placing the museum this way, it appears as part of the cultural environment associated with the Kronborg castle and the neighboring Culture Yard, while at the same time manifesting itself as an independent institution. Team Three used their findings from the developing neighborhood of Århusgade to create a compelling masterplan for density in , a developing city on the island of Amager surrounded by wetlands and filled with large-scale, disconnected housing projects. The whole structure was supported on a steel baseplate, tied to the ground with temporary screw piles.

Danish National Maritime Museum

Beyond Luxury The concept Gross National Happiness GNH was invented by Bhutan more than 40 years ago as an alternative quality-of-life indicator to the material wealth measured by the Gross National Product GNP. The movement focuses on creative, innovative and entrepreneurial changemakers and the futures they influence. Named as Partner in 2021, Douglass Alligood is a licensed architect in the State of New York, with over 37 years of industry experience.

Design and Architecture: What is Danish Design?

Our charrette provided just over 10 hours of dedicated working time for over 80 established experts in the fields of architecture, design, urban

planning, housing, health, and more, to work together to think about density as an unavoidable factor for the future.

CAPE

Because energy independence is essential to their success as a nation, the Danes have maintained a consistent drive over many decades to become more self-reliant, regardless of what party is in power, with disagreements focused on how — not whether — to best achieve their goals with all sectors of society benefitting. Together with Perrault, Jakob also developed several large-scale competitions including the Headquarters for EDF and Tours de Pont des Sevres, both in Paris, and the University ARTEM in Nancy, Seoul Opera House in South Korea and the University in Belval in Luxembourg.
