Optimal control and other optimisation problems. The committees will thus encourage interdisciplinary contributions as well as contributions related to the following topics : Dynamical Systems, Chaos, Transport, Complex systems, Self-organization, Biophysics, Hamiltonian systems, Mixing,

Quantum chaos, Control, Fluid mechanics, Plasma physics, Nonlinear optics A common intuition in dynamical systems is that systems with low complexity should have some sort of structure, while systems with high complexity should exhibit more randomness. Metzners 1985 model attempts to predict student persistence based on student and institution fit.
