## Aspirin

High levels of patient compliance to study protocol were indicated by various measures.

### Aspirin in Myocardial Infarction Study

The mean follow-up period was 475 days.

### Discontinuation of low dose aspirin and risk of myocardial infarction: case

Originally, it had a bronze gilded inscription as homage to Septimius and his two sons Caracalla and Geta for having restored and expanded the Roman Republic. Just like the Pont du Gard, Roman engineers built the entire structure without any mortar. We excluded respondents with a self-reported contraindication to aspirin use or a history of any CVD to limit the scope of the study to aspirin use for primary prevention only.

### The aspirin myocardial infarction study: final results. The Aspirin Myocardial Infarction Study research group

Although only six of these columns survive today, their sheer scale is enough to show the majesty of the Baalbek temples.
