### Interpreting Kant's Critiques by Karl Ameriks

Crucially, these included belief in God, the soul, freedom, and the compatibility of science with morality and religion.

### Interpreting Kant's Critiques by Karl Ameriks

The project of the Critique is to examine whether, how, and to what extent human reason is capable of a priori knowledge.

Running through Kant's various characterizations of judgments of beauty is a basic dichotomy between two apparently opposed sets of features.

### Kant's Critique of Pure Reason

However, approaches along these lines have not figured prominently in the literature on the Deduction. In other words, the subject experiences the real and the information received is processed, organized, analyzed by reason. Criticisms have also been raised against various aspects of Kant's characterization of judgments of beauty in the *Analytic of the Beautiful*.

### Heidegger's Interpretation of Kant: Categories, Imagination, and Temporality // Reviews // Notre Dame Philosophical Reviews // University of Notre Dame

Within this context the relation between philosophy, ontology, and fundamental ontology is shown to be rooted in the genesis of the modern mathematical sciences. Breitenbach 2014 argues that the ascription of purposiveness to organisms is a matter of our regarding organic natural processes as analogous to reason's intentional activity. Another strategy drawing on considerations outside the Deduction itself is to appeal to Kant's theory of aesthetic ideas see , which is ostensibly part of his theory of art, rather than his core theory of taste.

### Kantian Ethics (Criticisms)

For more on the objectivity of taste, see.

### **Books on reserve for Kant's Critique of Pure Reason**

Because the principle of nature's purposiveness is, in effect, the principle that nature is amenable to the activity of reflecting judgment itself, it seems to allow of being formulated in a corresponding variety of ways, that is, as a principle of nature's taxonomic systematicity, of its explanatory systematicity, of its empirical lawlikeness, and of its empirical conceptualizability. Both of these arguments are subjective in the sense that, rather than attempting to show how the world must be constituted objectively in order for the highest good to be possible, they purport to show only how we must conceive of the highest good in order to be subjectively capable both of representing it as possible and of fulfilling our duty to promote it.

### **Interpreting Kant's Critiques**

In the case of both notions, the experience of the sublime consists in a feeling of the superiority of our own power of reason, as a supersensible faculty, over nature §28, 261. *The World as Will and Representation*, translated by E.
