Frontiers of Earth Science

Like terrestrial plants, they use photosynthesis to turn light into chemical energy by consuming carbon dioxide CO₂ and nutrients in the water. Workshop attendees were then given the charge to identify high-priority basic research directions that could provide revolutionary new concepts to form the basis for separation technologies in 2020 and beyond. Reports are peer reviewed and are approved by the National Academies of Sciences, Engineering, and Medicine.

The ESWN recognizes that career advice alone is not sufficient, and that this should be accompanied by advice and support for the balance between personal life and work, which is done continuously through the online and in-person resources that ESWN provides. The ESWN provides a unique way to supplement existing mentoring programs and relationships.

Finally, we will close with guidance to authors on how to write a good Medical Physics paper. Thus, senior minorities in a department are often perceived as unable to help potential mentees even when the potential mentee is also a minority.

The following section of this paper will provide background on different types of mentoring and the obstacles that women can face under different mentoring strategies. ACKNOWLEDGMENTS ESWN was supported by the National Oceanic and Atmospheric Administration and the National Science Foundation under Grants HRD 0929782, 0929839, 0929509, 0930118, and 0929828. Members are elected by their peers for distinguished contributions to medicine and health.

The shortage of senior female faculty and the lack of retention along the career trajectory is not unique to the atmospheric sciences and is observed in many science, technology, engineering, and mathematics STEM fields. Publication Date: 1984-07-01 Research Org. Until roughly a decade

ago, most scientists assumed that phytoplankton remained in a sort of stasis throughout the winter and spring until sea ice break-up.

On January 1, 2014, editorial leadership of Medical Physics passed from esteemed long-time Editor Bill Hendee to a collective editorial group composed of the three presenters listed above. The NCAR and Facilities Section has the primary oversight role for NCAR and also contains the Lower Atmosphere Observing Facilities, and Educational opportunities programs.
