August 2019

Conclusion: The findings of this study are in line with many other studies that revealed that many doctors prefer to work in urban areas due to economic and career opportunities over rural areas. It also showed a inhibitory activity on free radicals of DPPHo and HOo at IC50 10. The objective of this study is to evaluate the influence of these demographic variables on access to public healthcare, a case for Nairobi County.

August 2019

The loss of support of the facial musculature is of great concern in treating completely edentulous patients. They are remote, isolated, left behind and as well do not use or rely on contemporary modern technology to provide ease and comfort of living.

Factors affecting the initiation of breastfeeding: implications for breastfeeding promotion

Therefore, what was analyzed in this study was work motivation factors, work discipline and work environment towards the work productivity of CdS health workers in the SMS area Municipio de Baucau.

International Scientific Indexing (ISI)

Aims: to identify relationship between childbirth assistant and pregnant gymnastics with smooth delivery.
