United Nations Division for Sustainable Development

Through international partnerships, we can collectively find more efficient, more comprehensive, and more sustainable solutions to address global challenges. Just the presence of a robust program creates an engagement halo effect for all employees.

Sustainable Development — Global Issues

The following examples provide a snapshot of recent achievements. A society built on the principle of solidarity does not abandon its citizens.

Pacific Regional—Economic growth and private sector development

Remy Shergill Deforestation, climate change, environmental waste.

Strategy and Policy Development

This section attempts to look at some of these issues. Part C studies enable you to develop expertise in one specialist area of environment and sustainability.

master of environment and sustainability

So if the return is so high, why isn't every company doubling down on engaging employees and inspiring them to take action? New Zealand government agencies are reviewing the goals and their alignment with Government priorities. We plan to introduce a carbon tax from 2019 so that those who emit the most carbon emissions will bear the cost to our environment and be encouraged to reduce their emissions.

United Nations Division for Sustainable Development

Our students and researchers bring different disciplinary and professional backgrounds to the table. The overall goal of PSDI is to reduce unnecessary costs of doing business in the Pacific and enable private sectors to formalize and grow, to create jobs, increase tax revenues, and lift people out of poverty. According to the recent results of the CDP, it is.

Five strategies to boost the Sustainable Development Goals

Green growth policies are an integral part of the structural reforms needed to foster strong, more sustainable and inclusive growth.
