While 117 of the lessons are labeled as aligned to the major work with a percentage of 72% based on the labeled alignments from the publisher, there are many instances where the actual work in the lessons is not accurately aligned to the standard as marked. Materials foster coherence through connections at a single grade, where appropriate and required by the Standards i.

The scoring rubric on page 136 indicates that students must be able to add decimals to the thousandths in order to be proficient.

Investigations in Number, Data, and Space (2012)

There are 13 sessions that are aligned to the beyond grade-level expectations, and the lessons should not be omitted because that would affect the underlying structure of the materials for the unit. There are also many other sessions in the materials that would need to be modified or omitted because of their alignment to above, grade-level standards. Patterned after the for mathematics, it is among the most widely used of the new curricula.
