## Winds of Evil by Arthur W. Upfield

Two well-loved, high school teens have disappeared, leaving only a running car and a bloody shoe. I recently re-read, and I still found it eerie. Just what is this Evil Wind that we are now speaking of? The policeman in charge is incompetent, so Bony must find the killer before he can strike again.

### Winds of Evil

I could not put it down. His wife is frustrated with the amount of time he's already spent away from home. I just happened to find this book at our local market.

### Winds of Evil

As a half breed in origins, schooled and successful and a renowned detective, this case is a particularly difficult one to solve. And how is local pastor, Enoch Jones, involved? Also, I like the main character and how observant he is.

### Winds of Evil

In this mystery, the setting is in New South Wales where periodic sandstorms blow through, and in this case, a sandstorm has hidden evidence of who committed a couple of murders and a near-murder. And the attempt on his life during a sandstorm is hot and picks up the sand blowing it into an immense cloud.

### Wind Evil

Why does the old Winnebago Indian write line after line in what has become an entire library of diaries? A number of interesting characters and relationships. Where the novel loses its half point with me is in the denouement, which falls flat and is disappointing, IMO. Bony goes undercover again, this time looking for a possible serial killer in a small town.

## Winds of Evil by Sharon K. Gilbert

His descriptions of Australia of long ago make you feel like you are there.

### **Winds of Evil by Sharon K. Gilbert**

The attitude of others towards Bony is amazingly egalitarian, considering I know there were prejudices towards aborigines. In the spring, the body is unaccustomed to the warm temperatures and the pores dilate easily, making it easier for evil-wind excess to enter the body. In Eridug everything was reduced to ruin, was wrought with confusion.

### **Wind Evil**

Upfield has a droll style. A case has gone cold.
