## Management guidelines for forestry and resource

If a hotel or chain has an exceptional product and service, OTAs share guest ratings, which can increase the number of reservations and referrals.

## Soil Erosion

The perspective of the tourist or viewer must be considered, along with the frequency of use, when determining the need for a no harvest reserve. .

## Soil Erosion

MNRF will lead a coordinated response to control and mitigate CWD in the province's wild cervid populations in response to a detection of the disease in either wild or captive cervids.

## Legal nonconforming rights trilogy in Ontario

One would usually find that younger age classes would cover a larger percentage of the land area than older age classes. The list of criteria or considerations is much more significant. Rental revenue less direct costs was compared to an estimated market value of cottage lots, to derive a net economic rate of return to the Crown.

## Evaluating property buyouts and disaster recovery assistance (Rebuild) options in Canada: A comparative analysis of Constance Bay, Ontario and Pointe Gatineau, Quebec

Protecting and recovering species at risk and their habitat is a key part of MECP's mandate. The report considered two alternatives: a financial-motivated alternative and a conservation-motivated alternative. We assessed the implications of different opportunity costs of capital, but do not reproduce tables with this assessment.

## **NOAA Office for Coastal Management Coastal Digital Elevation Model: Lake Ontario**

Independent hotels have the flexibility to customize or adjust their systems to position their property for success, and the location, product, service, experience, sales and marketing, and brand are all necessary for that success Cabañas, 2014. Additional infected wild cervids found? Unlike the accounting of this cost for Rondeau, a cost of compliance and enforcement was not itemized separately. Further research and validation are required to improve the sensitivity and specificity of these live-testing methods before they can be considered an effective tool in CWD management.

### **Legal nonconforming rights trilogy in Ontario**

Enhance CWD Knowledge Effective wildlife disease monitoring is a challenging task for any single organization.
