## 15 Picture Books about Cars, Trucks and Trains

Does it get better than this classic book about a little truck that gets stuck while pushing a dump truck out of the muck? All of in any site.

### Cars, planes, trains: where do CO<sub>2</sub> emissions from transport come from?

There's an educational component to it as well, with pages dedicated to finding colors, finding shapes, counting monkeys, matching drivers to their vehicles and finding pairs.

### Transportation Coloring Pages

Plus the truck sounds and animals noises make this one an extra fun read-aloud. The reviews are the best! Little Blue Truck and Little Blue Truck Leads the Way are some of the best board books although maybe they also come in hard or soft cover? They highlighted long-distance road freight large trucks , aviation and shipping as particularly difficult to eliminate. And other favorite vehicle books I missed? The IEA scenario assumes the phase-out of emissions from motorcycles by 2040; rail by 2050; small trucks by 2060; and although emissions from cars and buses are not completely eliminated until 2070, it expects many regions, including the European Union; United States; China and Japan to have phased-out conventional vehicles as early as 2040.

### Cars, Trucks & Trains

About seven years ago, my sister and I were driving in the car together with no children. Aviation — while it often gets the most attention in discussions on action against climate change — accounts for only 11. In its Energy Technology Perspectives report, the International Energy Agency IEA expects global transport measured in passenger-kilometers to double, car ownership rates to increase by 60%, and demand for passenger and freight aviation to triple by 2070.

### Jane Murphy

This data is the International Energy Agency IEA. At first I tried to talk him out of it, but I eventually resorted to hiding the book. Super Truck, Mixed Up Truck, and Little Tug are all some favorites of ours too.

## **15 Picture Books about Cars, Trucks and Trains**

As the world shifts towards lower-carbon electricity sources, the rise of electric vehicles offers a viable option to reduce emissions from passenger vehicles. I love this wacky book about various matchups between a shark and a train.

I loved Mike Mulligan but hated reading a large one we had that was just pictures and descriptions of different vehicles. Print airplanes and the Space Shuttle coloring sheets. Packed with flaps, Cars, Trains, Planes, and Trucks takes kids on a learning adventure through Discovery City.
