ComputerCo Enters The Mini-Computer Market with their First Seven Inch Netbook

World's Smallest Fully Functional Netbook

Houston, TX - ComputerCo today announced the worldwide release of the ["MiniCo 7"](#) (<http://www.computerco.com/moco7>), the world's first seven inch netbook, that combines the best in connectivity, style and entertainment features from ComputerCo's bigger laptop computers in a smaller package to bring users the next level in mini-computing.

"Consumers have been for more affordable and smaller portable computing devices, and we've responded by introducing our smallest ever computer, making mini-computing more useful and redefining today's market," said Maria Williams, Vice President, New Product Development, ComputerCo. "Throughout our company, we have strived to give customers the best possible experience with the smallest viable netbook on the market."

Performance and Portability

Whether it's looking at photos, playing music, emailing or surfing the web, consumers want smaller and more portable PCs. The MiniCo 7 raises the bar for netbook computing. For the first time ever, netbook users can enjoy high definition video with smooth playback.

"The MiniCo 7" features a powerful processor that delivers functionality normally found in bigger laptops at a lower price point and smaller size," said Frank Smith, Operations Manager, ComputerCo. "This little netbook is perfect for watching movies, playing games, and even editing photos or videos."
