## Research Distinctions

In this context, UNESCO and ICSU should develop concrete initiatives for international scientific cooperation together with relevant United Nations organizations and bilateral donors, in particular on a regional basis. Our Vision The vision of NFDI4Chem is the digitalisation of all key steps in chemical research to support scientists in their efforts to collect, store, process, analyse, disclose and re-use research data. In learned societies and the academy more generally, we are used to research taking years from design to ultimate publication, whereas now studies have been funded, reviewed and published in a matter of weeks.

Educational institutions should provide basic science education to students in areas other than science.

## Learned society

AFAE was founded with the ambition to promote the plurality of anthropology, its development, its practices, its transmission and its future in its multiple fields of application. It is imperative to tackle the issue of the endogenous generation of technologies starting from problems faced by developing countries. Those present at the event on 27 September emphasised the need for societies to remain focussed on their core mission, acknowledging that this could sometimes be in tension with their revenue-generating activities.

## UNESCO

Societies also face inflationary cost pressures, with some grappling with complex property transactions and growing pension liabilities. It is necessary that women participate actively in shaping the agenda for the future direction of scientific research. The other partner organizations should do likewise vis-à-vis their governing bodies; the United Nations General Assembly should also be seized of the outcome of the World Conference on Science.

## **Plan S Principles**

For example, universities play an increasingly important role in the innovation system. These research programmes should include programmes for capacity-building.

### **Associations, federations and learned societies**

Located in Paris since 2000, the French association Loi 1901 «Ethnologues en herbe» organizes contemporary ethnology and digital creation workshops in France and other francophone countries. In particular, no later than 2001, UNESCO and ICSU shall prepare jointly an analytical report to governments and international partners on the returns on the Conference, the execution of follow-up and further action to be taken. Research in science and technology education needs to be furthered nationally and internationally through the establishment and networking of specialized centres around the world, with the cooperation of UNESCO and other relevant international organizations.
