# How to write a Bibliography

Many students come to us for help in research. One of the most common things they ask us is "What do we have to do for a bibliography? How do I do that?" Well, here's our short bibliography - what they and we have to do.

**What is a bibliography?** (See also [What is a reference?](#)) A bibliography is a list of books or other publications by a specific author or publisher; or an alphabetical list of all the books or publications in a library. It is also a list of sources used in a research paper. If you are writing a research paper, it is important that you give your reader credit for the sources of information. What do you do if you find a source of information that you did not use? You can still include it in your bibliography, as long as you let the reader know that the information did not come from your paper. In this case, you would cite the source as "not used".

**How to write a Bibliography**

- Bibliographies can either be:
  - 1. Books with one author:  
Bogart, ED. *The Blue Book*. Totowa, 1988.
  - 2. Books with more than one author:  
Dawson, ED. and LIND, W. *Books on Space*. New York, 1988.
- Article in a magazine:  
Zogby, Paul. "War of the Unknown." *Medical*, February 10, 1993.
- Article in a newspaper:  
Hart, Michael. "The Sun Struck to Die Hard." *The Disk and Mail*, March 11, 1990, p. A1.
- Article in an encyclopedia:  
"Astronomy." *Encyclopedia Britannica*, 1988.
- Video or film:  
"The Last Days of Pompeii." National Film Board of Canada (Feature), 1987. VHS, 90 min., 16 mm.
- Radio or television program:  
"The Last Days of Pompeii." *Nature*, PBS, December 19, 1992.
- Interview:  
"John Gutfreund (Continued)." *Personal Interview*, April 10, 2000.
- Information from the Internet:  
Include the web site address and the date the information was researched:  
<http://www.biblio.com/bibliographies/encyclopedia.htm>

Description: -

- Bibliography in an age of science
  - Bibliography in an age of science

### Notes: Second annual Windsor lectures.

This edition was published in 1952.

## Protestants in an Age of Science: The Baconian Ideal and Antebellum American ...

This book discusses about the contrasts and differences about how the Christian God is related to science. In the end, he has deep praise for a good and mysterious God.

## **Medical Bibliography in an Age of Discontinuity**

I heard Polkinghorne interviewed and was impressed by his reasonableness, if not by his theism. Polkinghorne gets into some very interesting discussions about science and religion and how we seek truth in both of these realms. There was a lot of material that was redundant and I preferred the presentation in the previous book.

## **Belief in God in an Age of Science by John C. Polkinghorne**

I marked it at three stars partly for its difficulty. John Polkinghorne is a trained particle physicist who has worked within the field for 25 years, having initially obtained his PhD under the guidance of the illustrious Pakistani physicist Abdus Salam.

## Protestants in an Age of Science: The Baconian Ideal and Antebellum American ...

The catch-22 facing theology is that, to modern thinking, it must meet the burden of proof, but its central belief is unprovable.
