Diurnal pressure variation

Over land, the largest fluxes occur over the SH desert regions.

Monthly Diurnal Global Atmospheric Circuit Estimates Derived from Vostok Electric Field Measurements Adjusted for Local Meteorological and Solar Wind Influences in: Journal of the Atmospheric Sciences Volume 69 Issue 6 (2012)

The correction mainly impacts the North American boreal region and a few places of southeastern Asia where Andosols and Histosols dominate. A Possible Approach for the Decadal Prediction of the Summer Precipitation Over North China. During all seasons the tight gradients observed in the ITCZ and SPCZ are not well captured in the reanalyses.

The storm paralyzed the East Coast from the Chesapeake Bay to Maine to the Atlantic provinces of Canada. Oates, 2019: Meteorological observations for Eversleigh Station, near Armidale, New South Wales, Australia: 1877-1922. Frontiers in Marine Science, 6, doi:

Diurnal Variation of Precipitable Water over a Mountainous Area of Sumatra Island on JSTOR

These sites in the south sector are often rainy or cloudy during summer, so the overestimation of O 3 is likely to be due to the model's underestimation of precipitation and cloud cover Ni et al. The WGS84 ellipsoid differs very slightly from the GRS 80 ellipsoid. Upper level variations of temperature distort isobaric surfaces.
