## Department of Chemical and Biological Sciences

Our goal is to provide the next generation of life scientists with the background needed to make new advances in the quantitative understanding of living systems. Another recent development in Jeffery Kelly's research group promises to bring medicinal chemistry at Scripps Research one step closer to clinical trials. A provides undergraduate students an opportunity to engage in authentic and focused research and acquire skills beyond what a normal research experience in an Honors or Specialization program may allow.

## Chemical Sciences, Geosciences, ...

We are at the cutting edge of developing tools and methods for understanding what drives biological and chemical processes; we are leaders in the fields of mass spectrometric imaging, solid state NMR, Raman spectroscopy, and single particle analysis.

## Chemical and Biological Sciences

Research within biological sciences is carried out in the fields of biochemistry, molecular biology, genetics, physiology of development, ecology, and population and evolutionary biology. Each curriculum unit provides examples about implementing Primary Connections guided-inquiry teaching and learning approach. Physical Biochemistry No course may be used to satisfy more than one requirement.

## International Journal of Chemical and Biological Sciences

Students are encouraged to begin thesis research in a laboratory no later than the start of their junior year. The Biological Sciences curriculum prepares students for graduate school in a range of biological disciplines, as well as for professional schools in medicine, dentistry, veterinary medicine, pharmacy and related fields. These courses, together with a wide variety of elective course offerings, provide majors the choice to either explore the breadth of the field or follow a more in-depth study of any of its subdisciplines.

## Chemical Biology < University of California, Berkeley

For students interested in the interface between biology and chemistry, this program articulates well with a second major in Chemistry. Year 1 Semester 1 Credits Semester 2 Credits CH4701 General Chemistry 1 6 BY4102 Biology for Biosciences 6 BY4001 Biology 1 6 CH4102

Organic Chemistry 1 6 MA4601 Science Mathematics 1 6 PH4142 Introduction to Physics 6 CH4021 Laboratory Calculations 3 MA4602 Science Mathematics 2 6 ER4011 Introduction to Environmental and Biosciences 3 CH4031 General Chemistry 2 Inorganic 3 CH4051 Introduction to Applied Chemistry and Biochemistry 3 CH4041 General Chemistry 2 Physical 3 CS4131 Introduction to Scientific Calculations 3 CAO points history 441 Minimum grades Applicants are required to hold at the time of enrolment the established Leaving Certificate or an approved equivalent with a minimum of six subjects which must include: Two H5 Higher Level grades and Four O6 Ordinary Level grades or four H7 Higher Level grades.

### **International Journal of Chemical and Biological Sciences**

Tuition Fees These are based on Residency, Citizenship, Course requirements. Center for Pesticide Analysis for the Eastern Mediterranean Region.

### **Biochemistry and Molecular Biology, B.S. < University of California Irvine**

Academic stakeholders are well engaged with the private sector and have attracted increasing leverage from project partners over the last Delivery Plan period. A thesis based on laboratory research is required to be eligible for honors in the Chemical and Physical Biology concentration.
