## A novel treatment of cystic fibrosis acting on

Nat Rev Mol Cell Biol 6, 476-486. After transfer to nitrocellulose membranes, Dfp1—6his-3myc was detected with 9E10 antibody.

## A novel treatment of cystic fibrosis acting on

Consistent with this possibility, the budding yeast Cdc7 kinase is required for late origins to fire ,.

## A novel treatment of cystic fibrosis acting on

In one-hybrid assays with budding yeast Dbf4, motif N mutants exhibit reduced interaction with a replication origin. It first appears at late G1, accumulates through S and G2, and disappears at mitosis.

## Bipartite Binding of a Kinase Activator Activates Cdc7

Characterization of a second human cyclin A that is highly expressed in testis and in several leukemic cell lines.

## Sequential steps in DNA replication are inhibited to ensure reduction of ploidy in meiosis

The pink bar indicates that a pulse of 1NM-PP1 was applied at 6.
