socio-economic and political relations. Sir William Blair provides the foreword to a book which acknowledges that Islam continues to play a vital role not just in the Middle East but across the wider world, the discussion on which the authors embark is a crucial one.

Although most Arab states now have national codes of law that reflect Western influence, fierce internal struggles continue over how to interpret Islamic law, particularly in the areas of gender and family. The new wave of Islamic thinking which they represent emerges as multi-stranded rather than defined by a single trend or doctrine. Themes covered include a deconstruction of patriarchal interpretations of the Qur'an; the distinctions between universal and context-specific parts of Islamic texts; a re-contextualisation of Shar'i'a law; and a critique of religious jurisprudence, particularly where this impacts on matters of sex and gender.

## **Rome et les églises nationales, VIIe**

Since Europeans first colonized Arab lands in the 19th century, they have been pressing to have the area's indigenous laws and legal systems accord with Western models. The book provides a timely examination of the issue of modern Saudi Arabia, Islamic legal order vis-à-vis the contemporary concept of international law and international relations in specific areas such as international human rights law and trans-national economic matters.
