The important characteristic of an efficient material handling equipment is the time required to pick up or set down load. A good layout reduces the material backtracking, unnecessary workmen movement ensuring effectiveness in manufacturing.

Plant Layout Material Handling

Reduce or eliminate excessive inventory. All the facilities like equipment, raw material, machinery, tools, fixtures, workers etc.

My Funny Blog: Relationship between plant layout and material handling

The quality and cost of the product and, therefore, the ratio are directly affected by the facility design. Unskilled workers can learn and manage the production. The efficient and economical material handling system can be designed and selected for installations only after the floor plan has been adequately organized.
