An examination of some of the preparations of this medicine, will be necessary, for explaining their effects on the body, and the different degrees of activity which they possess; and, consequently, the several theories founded upon them. Physicians, at the present day, recognise no specific medicines; and are willing to keep open the door of investigation on such subjects as are unexplained, by acknowledging their want of information, and exciting an inquiry into the more abstruse and unexplored regions of medical science. Galen considered it as a poison, which was unfit for use as a medicine; and some physicians were of opinion that it destroyed the stomach by eating holes through the coats of that organ.
