Neuroblastoma

Thus, the patient's immune system genes help determine response to immunotherapy for neuroblastoma. Dr Schor outlines a

Filesize: 40.710 MB

new approach to these tumors in order to make a difference for these children.

Neuroblastoma as a Neurobiological Disease

In patients with stage 4 disease at diagnosis, the 5-year PFS was 10% and most patients who were alive with disease at 5 years died of neuroblastoma over the next 5 years; 10-year OS was 19%. Patients were assigned to receive two, four, or eight cycles of chemotherapy on the basis of the tumor biology, age of the patient, and symptoms. In certain circumstances, very young infants may be observed closely for signs of tumor progression without treatment.

Neuroblastoma in Children and Teens
