The effects of treatment of seedling coleoptiles with sodium fluoride. The first-generation limit to citizenship by descent does, however, apply to persons born outside Canada after the first generation to a parent whose citizenship was restored or conferred as a result of the legislative amendments which came into force on April 17, 2009, and where that person would have been a citizen only through this restoration or conferral on their parent. Methoxyflurane nephrotoxicity — a study of dose response in man.

## Cabinet of Canada

For example, the pathway involving airborne fluoride, forages, and domestic cattle has been studied extensively.

## Soils of the Lethbridge area (82H NW)

The effects of fluorinated anesthetics on the liver and kidneys. Renal lesions multiple proximal tubular dysfunctions identified in residents of cadmium-polluted Hosogoe, Kosaka Town, Akita Prefecture, Japan.

## Background levels of minor elements in some Canadian soils

June 2021 Although the 1947 Act declared that British subjects who were born in Canada before 1947 acquired Canadian citizenship on 1 January 1947, and were left out of the 1947 Act because those who were born before 1 January 1947 were not British subjects. Literature on the biochemical and morphological changes caused by exposure of terrestrial vegetation to fluoride has been reviewed by McCune and Weinstein 1971 , Chang 1975 and Weinstein 1977.

## Fluoride Action Network

Ishio and Makagawa 1971 report that Potphyxix tenaa, an alga, was killed by a 4-hour laboratory fumigation with fluoride 1. Between 1 January 1947 and 14 February 1977, multiple citizenships were only allowed under limited circumstances.

Welcome

On 15 February 1977, the restrictions on multiple citizenships ended. Those who lost their Canadian citizenship or British subject status under the 1947 Act or the British 1914 Act regained or gained Canadian citizenship in 2009 and 2015, respectively.
