### UK Continental Shelf Oil Well Records (Paperback, 52nd phase): Great Britain: 9780114150778

Legislation requires parties that drill certain types of wells to deposit specific records and samples with the BGS.

#### Electrification of platforms

An associated risk here is that high-carbon-intensity developments may struggle to meet sanctioning requirements and late-life producing assets may face permanent shutdown earlier. The annual results season has been peppered with announcements of cuts to capital spending and urgent action to reduce running costs. Looking ahead, Harding said in a company webinar that the firm has been given indications from companies that 23 exploration and 10 appraisals wells could be drilled in the UKCS next year, depending on the impact of Covid-19 in 2021.

#### Statfjord oil field

The UK oil and gas supply chain services domestic activities and exports about £12 billion of goods and services to the rest of the world. ANY FAILURE TO COMPLY WITH THESE RESTRICTIONS MAY CONSTITUTE A VIOLATION OF THE SECURITIES LAWS OF ANY SUCH JURISDICTION.

#### Oil's not well: UK industry in crisis as pressures continue to mount

The oil and gas industry's knowledge of undersea geology, reservoir management and will play an important role in making this technology work effectively. Thematic Reports Are you worried about the pace of innovation in your industry? Electrification of oil and gas platforms on the UK continental shelf UKCS should play an important role in efforts to achieve this target, as a Rystad Energy analysis shows that UK oil and gas production will remain significant for decades to come.

#### Oil and gas industry in the United Kingdom

The organisation allows the industry to consolidate and improve its work in generating and developing the talent needed to sustain the long-term future of the UKCS and export learning internationally.

## **Backers pump millions into oil well decommissioning pioneer**

At the same time, access to lower-cost electricity directly from offshore wind farms for oil and gas operators creates commercial opportunities for wind developers to expand. The reduced levels of activity and confidence have also negatively impacted employment levels, with approximately half of contractors surveyed reporting a decline in their workforce, 22% of which report reductions which equate to more than 10% of their workforce. These individuals are consulted on what needs to be done and are charged with ensuring that the Step Change programme is implemented.

### **Around the world: how has Covid**

Hydrogen is a low-carbon energy source which could replace fossil fuels in power generation, heating and transportation. In 2008, oil produced on the UKCS satisfied almost all domestic consumption 97% while gas produced in the UK met about three quarters of demand.
