## The Eyes Have It: Sex and Sexual Orientation Differences in Pupil Dilation Patterns

Learner extent of use of the learning management system features was as shown in the table below in percentage Table : From the table, very rarely used features include the blog and wiki while very often used ones include the email, forum, chat and calendar. New Orleans, LA, April 1—5, 2002. All parents were asked to provide their written informed consent prior to data collection.

## Gender and Technology in Hong Kong: A Study of Pupils' Attitudes Toward Technology

As far as leisure reading in digital settings is concerned, we reject the very broad conception of digital literacy adopted in some previous studies, such as being on social websites during free time and reading e-mails from friends see.

## Pupils' attitudes to technology in key stage 3 of the national curriculum: A study of pupils in South Wales

All in all, the combined teacher-perception variables of student attributes explained 3 % of the variance in teacher expectations on top of student performance. Socio-ethnic status was included because previous research in the Netherlands has shown that low SES students tend to receive lower recommendations from their teachers Claassen and Mulder ; De Boer et al.

## Gender Differences in Students' Attitude towards Science

Teacher expectations and self-fulfilling prophecies: Knowns and unknowns, resolved and unresolved controversies. Teacher expectations, classroom context, and the achievement gap. Our study however, delves into improved performance but seeks to establish the potential of blended learning effectiveness by considering grades obtained in a blended learning experiment.

## The Eyes Have It: Sex and Sexual Orientation Differences in Pupil Dilation Patterns

Edison Trickett and Penelope Trickett, comparing students at private single-sex schools in the United States with students at private coed schools in the United States, found that students in the single-sex schools had a far more positive attitude toward academics than did students in coed

schools. Effective blended learning would require that learners are able to initiate, discover and accomplish the processes of knowledge construction as antecedents of blended learning effectiveness. Otero SC, Weekes BS, Hutton SB 2011 Pupil size changes during recognition memory.
