

New Finnish research targets

Finnish American Historical Society of the West - Competing risks analysis highlights new targets in preventing ESRD and death of diabetics

Description: -

- South Africa -- Foreign relations -- Developing countries.
Developing countries -- Foreign relations -- South Africa.
Apartheid -- South Africa.
Economic sanctions -- South Africa.
Marivaux, Pierre Carlet de Chamblain de, -- 1688-1763.
Art
Finns -- United States.

International Team Targets Innovations in STEM Learning

However, this is not time to relax - far from it. The competing risks of death and ESRD may confound the estimates of risk for each outcome. The study showed that half of the patients could have been given a diagnosis of Alzheimer's disease around a year earlier.

Breakthroughs in Medicinal Chemistry: New Targets and Mechanisms, New Drugs, New Hopes

FCAI SIGs offer important contributions to the FCAI research and impact agenda and take advantage of FCAI results. Modern hospitals have huge data reserves that could be utilised in diagnostics by systematic mathematical modelling. During this period, the SBTi has also evolved from a nascent project, powered by the four founding organisations, towards the de facto standard embraced by the climate action ecosystem, including 1,500+ companies and seeking to align their portfolios with global climate goals.

Method developed by Finnish researchers targets diagnosis of early Alzheimer's disease

The method will be tested at several memory clinics in Europe over the next few years. Each of these three examples brings researchers together to capitalize on important work by the other side of each bilateral team.

FinnGen research results integrated into Open Targets Genetics

The two research groups share a series of research questions that focus on specific questions of literacy and language development, along with broader questions about sustaining the engagement of young learners who use the MyST, Graphogame, and MindStars technologies.

International Team Targets Innovations in STEM Learning

The project takes the Graphogame pedagogy for learning foundational word reading skills, and embeds these skills in learning experiences that lead to fluent reading of science texts with deep comprehension using MyST technology. Coordinating professor: Professor , Aalto University Research Program 4 Privacy-preserving and secure AI contributes to objectives 1 and 2 with security and privacy research.

Introducing our ambitious, new climate strategy

VTT has shown that the new method could allow as many as half of patients to get a diagnosis approximately a year earlier. The competing risks of death and ESRD may confound the estimates of risk for each outcome.
