FDA permits marketing of transcranial magnetic stimulation for treatment of obsessive compulsive disorder

Support groups can also be very helpful.

Obsessive

A general physical with blood tests is recommended to make sure the symptoms are not caused by illicit drugs, medications, another mental illness, or by a general medical condition. Most commonly, antidepressants are tried first. Explore healthy ways to channel your energy, such as hobbies and recreational activities.

Obsessive

Some antidepressants can make some other medications less effective and cause dangerous reactions when combined with certain medications or herbal supplements. It can take weeks to months after starting a medication to notice an improvement in symptoms.

List of Obsessive Compulsive Disorder Medications (25 Compared)

Most individuals that get treatment for OCPD are encouraged to do so by a spouse or loved one. Hoarding disorder can negatively impact someone emotionally, physically, socially and financially, and often leads to distress and disability.
