It spreads by underground rhizomes so be aware and contain it if needed. Detrick is a professional photographer whose images of nature and gardens appear in media worldwide.

## Perennials

They recommended that I cut it all the way back to the ground and said that it would possibly come back in the fall. I am worried that without the shade of the tree limbs it may be too exposed to thrive.

## General Care

I don't trim back the lantana until after danger of frost is past so I'm not certain what the problem is.
