### Stuttering: Top Drugs That Work

Without a positive coping mechanism, individuals may be affected in their choice of careers, or position in the community. Speech is the process of producing specific sounds that convey meaning to the listener. The use of some electronic devices can be helpful in treating this disorder.

### Stammering: Know How Can You Cure This Speech Disorder With Homoeopathic Remedies

Therapy can help your child to improve pronunciation. If this is how someone feels when they go to the post office, imagine what it must be like to go to work, to go shopping, to catch a train, and to meet unfamiliar people every day. However, stuttering that persists may require treatment to improve speech fluency.

### THE CAUSE AND CURE OF SPEECH DISORDERS; A TEXTBOOK FOR STUDENTS AND TEACHERS ON STUTTERING, STAMMERING AND VOICE CONDITIONS.

There is low self-esteem, shame, and anxiety. In medical terms, stammering is known as dysphemia.

### The Cause and Cure of Speech Disorders. A Text Book for Students and Teachers on Stuttering, Stammering and Voice Conditions.

The tongue is red on the edges and may appear like a strawberry tongue.

### Neurogenic Stuttering

Pace Yourself This technique can really be helpful, especially for those who want to be stage performers but still dealing with stuttering.

### Stuttering: Definition, Symptoms, Traits, Causes, Treatment

Practice this process for 2-3 months to see a change in your speaking. Speech therapy is an option for some children. The connections between language centers of the brain and the muscles that are used in speaking are weakened or disconnected.

## **Neurogenic Stuttering**

Stuttering speech is a disorder that is usually characterized by repeated syllables, words, or sounds. Last medically reviewed on September 9, 2019 © 2004-2021 Healthline Media UK Ltd, Brighton, UK, a Red Ventures Company. Most children will have some level of stuttering as they grow, but some will have problems that persist.

### **Stuttering: Definition, Symptoms, Traits, Causes, Treatment**

Experiments show that only a minority of patients who seek help for stuttering through drug treatment alone respond with increased fluency.
