**FCJ**

In evaluating skills-based literacy instruction versus whole language literacy instruction, a long-term debate continues to percolate among theorist, researchers and educators as to which approach is the most effective instructional practice. Check back soon for my next guest blog post, which will contain ideas for integrating the two processes. References Areas of the brain involved in reading and writing Blanke, M.

**Literature**

They have initial knowledge of a writing system including the names of the letters and can recognize some common written words. As an extension, he knows that he'll need to have his students reading literature, but he's not sure exactly how to do that. When you start to feel more adventurous try to combine all four skills.

**Skills**

We engaged a variety of texts, including theory, pop culture, film, e-fiction, film and more traditional literary objects.

## Creating “Viral” Impressions: Composing Infographics for the Classroom and Work Space

Two decades of research in diverse fields have led to a new understanding of a far more complex relationship between thought and language than that characterized by earlier behaviorist models of language and literacy acquisition. The assignment, difficult in its own terms, comprised a long-term comparative and theoretical analysis of three films that took as their rhetorical and formal subjects simultaneous and multiple temporalities this assignment abides in a non-digital visual studies component of a longer course that had not yet arrived at integrated digital technologies. When the children in the study reached school age, some were identified as more ready than others for school by teachers using school-approved testing measures.

The parents saw the growth in writing and reading, and so did the students! The Invention Process If you are apprehensive about getting started on your infographic, be assured that the development process replicates a process that you are already familiar with: the writing process.

### **Reading and Writing for Understanding**

Sociocultural differences and lack of prior literacy experiences further complicate their second language literacy acquisition.
