### Hazard Identification and Assessment

A hazard is any existing or potential condition that can lead to injury, illness, or death to people; damage to or loss of a system, equipment, or property; or damage to the environment.

### Hazard Identification and Assessment

Unlike natural disasters like cyclone, flood, and tsunami etc.

### Hazard Identification and Assessment

Assign Follow-up Action Responsibilities are assigned for follow-up action s.

### Checklists in Hazard Assessment

This document is directed to those persons you who are subject to the PCHF requirements of part 117. Sometimes, a process-based checklist may incorporate behavior-based checks, and vice versa. Risk acceptance can be a formal decision to accept the residual risk or it can be a passive decision in which residual risks are not specified.

### A Complete Guide to the Risk Assessment Process

Whatever your objective, define it clearly. Instead, you should prioritize risks to focus your time and effort on preventing the most important hazards.

### Procedure for Hazard Identification, Risk Assessment, And Determining Controls

Hazards are classified in terms of the severity of consequences arising in the case of occurrence and are recorded in a hazard log. The identification of a hazard can be done by i direct observation, ii consultation, iii historical data, iv research, v audits, and vi standards.

### **Hazard Identification**

Minimum risk does not mean zero risk, which may not be attainable.
