

Tree-climate relationships and dendroclimatological reconstruction in the British Isles.

University of East Anglia - CSIRO PUBLISHING

Description: -

-Tree-climate relationships and dendroclimatological reconstruction in the British Isles.

-Tree-climate relationships and dendroclimatological reconstruction in the British Isles.

Notes: Thesis (Ph.D.) - University of East Anglia, School of Environmental Sciences, Climatic Research Unit 1984.

This edition was published in 1984

PhD Theses

Table gives details of these sites, including the age of the stands and the local geologies. Specifically, we asked three questions as follows.

Árvai M, Morgós A, Kern Z(2018). Growth

. Snowpack is limited to a relatively small area e. .

Reconstruction of New Zealand Temperatures Back to AD 1720 Using *Libocedrus bidwillii* Tree

An evaluation of GCM simulations of precipitation on monthly and daily time-scales 1996 Hulme, Dr M.

Climate response of oak (*Quercus spp.*), an evidence of a bioclimatic boundary induced by the Carpathians

A cubic spline with a 50% frequency cut-off at two-thirds of the series length was fitted and an index was calculated as the ratio of the raw ring width data to the spline. Altitudinal patterns of growth variability and its drivers Previous tree-ring studies along geographic gradients generally focus on the change of RWI-climate relationship, instead of the temporal growth variability during climate change.
