Also noted in this area was another steel pin which was sheared off at the top of rock level and appeared to have been abandoned for some time.

Annual report for the year 1977

Conflicting information has been received, but the machinery apparently was operated by local persons, some of whom may have been students trained at the school. Rather, it appears the pipe was unbolted at some time in the past and left open.

Internal Revenue Service Statistical Data

The final height of the dam was approximately 42 feet above the rock foundation. The crest of the secondary spillway is seven feet below the top of the dam.

New York City Blackout 1977: A Dark Hour in More Ways Than One

A soil sampling device consisting of thin-wall tubing which is driven into a soil to obtain a sample. Testing was conducted in accordance with Corps of Engineers Manual EM 1110-2-1906, Laboratory Soils Testing. On the extreme right side, the flood had cut to rock.

New York City Blackout 1977: A Dark Hour in More Ways Than One

Other highlights for the year included the continued refinement and additions to the computer programs for BPA system studies. NOTE: The latest versions of Adobe Reader do not support viewing PDF files within Firefox on Mac OS and if you are using a modern Intel Mac, there is no official plugin for viewing PDF files within the browser window. This AIWP has been organized and written to meet the specific needs of Program Action Items 10.

FACT CHECK: Did a 1977 'Time' Story Offer Tips on 'How to Survive the Coming Ice Age'?

An opening in a rock or soil not occupied by solid matter. This installation served as a power source until 1957 for the Toccoa Falls Bible Institute, which later became the Toccoa Falls College.
