BOOK SYNOPSIS This book deals with the early development of Śaivism in ancient Dakṣiṇā Kosala, the region that roughly corresponds to the modern state of Chhattisgarh, plus the districts of Sambalpur, Balangir and Kalahandi of Odisha formerly Orissa. He shows how the method was adopted by Islamic Central Asian natural philosophers - most importantly by Avicenna, one of the most brilliant of all medieval thinkers - and transmitted to the West when Avicenna's works were translated into Latin in Spain in the twelfth century by the Jewish philosopher Ibn Dā'ūd and others. Faunal remains consist of shellfish, marine fish, sea mammals, and birds.

Other artefacts are bone and shell fish hooks, lure shanks, bone needles, a bird spear point, a probable bull roarer, and a seal-tooth pendant. A terrace low on the slope above the natural cliff defences contained five storage pits, dug at different times, and some with multi-period use. Large numbers of adzes at various stages of manufacture through to fully polished form are present.

The studies focus on the Skandapurana, Vakataka-Gupta history, Ramtek Ramagiri, Mansar, Ayodhya, Benares, pilgrimage and holy places tirtha. Epigraphical evidence, supported by archaeological remains, has shown that by the time of Śivagupta's reign, which lasted for at least fifty-seven years, Dakṣiṇa Kosala was already a rich centre of early Śaivism. And yet a historical overview, however brief, has become an indispensable element of nearly every dissertation and scholarly article.
