## Great lives from history. The Middle Ages, 477

The scope of coverage includes ancient times to the present, worldwide, with an emphasis on North America and the West. Pure scientific theories such as laws of physics were excluded, although rare exceptions were made for such systems and tools that have had a comprehensive influence on our way of interacting with the world, such as Aristotle's invention of the first system of biological taxonomy, Newton's creation of the calculus, and Einstein's theories of relativity.

## Great lives from history. (2007 edition)

A companion set, Great Events from History: The Middle Ages, covers events from the same period. Along with this information, readers can find their nationality and occupation, synopses of their historical importance, birth and death information, and areas of achievement, followed by suggestions for further reading.
