This dependence on wild boar is largely due in part to the local leopard subspecies' large size. In most areas, boars constitute only a small part of the leopard's diet.

### **Wild boar bites off woman's finger in western Japan city**

Some linked to boars include and. In the and the , the Pig is replaced by the. Fully grown males are usually solitary outside the.

### **Wild boar Facts**

The actual birth only lasts between 2-3 hours, after which the sow and her piglets remain close to the nest for a further 4-6 days before rejoining the herd group. The suids were released into the wild by wealthy landowners as big game animals. The Pig is assigned to govern the time between 21:00 hrs to 22:59 hrs.

### **Pig (zodiac)**

A PCR product of 359 bp including the primer sequences was obtained from meat 3 by nested PCR.

### **Pig (zodiac)**

Wild boar rest in shelters, which contain insulating material like branches and dry. Its is also acute, though its is comparatively weak, lacking and being unable to recognise a standing human 10—15 metres 33—49 ft away.
