Ironically, however, crises in the financial sector brought about the downfall of first the political structures of the old Republic, and finally the near-demise of the Dutch economy most of all the financial sector in the first decade of the 19th century.

## Investing in the Netherlands

The birth of the VOC is often considered to be the official beginning of corporate-led globalization with the rise of modern corporations multinational corporations in particular as a highly significant socio-politico-economic force that affect human lives in every corner of the world today.

## Investing in Dutch real estate for foreign investors

The Dutch financial sector, both in its public and private components, came to provide a wide range of modern investment products beside the possibility of re-investment in trade and industry, and in infrastructure projects. All government measures can be consulted on the website of the.

## Logo of the Dutch government

Each member firm of Crowe Global is a separate and independent legal entity. Where in other instances the modern fiscal system resulted from, and was made subservient to, the interests of a centralizing monarchical state, in the Dutch instance the emerging fiscal system was the basis of, and was mobilized in the interests of the defense of, a stubbornly decentralised political entity.
