## Managing Contaminated Sites

It is important that LUST personnel reinforce these required targets in the event that an enforcement action becomes necessary.

### Superfund

The planning permit was issued before the completion of the environmental audit and therefore the ongoing requirements to manage the contamination issues at the site were not incorporated in any legislative tool attached to the site, such as a section 173 agreement or land title.

### January 2015 CivicSD Board Meeting Approved Drawings

Environmental audits must follow relevant EPA environmental audit guidelines and standards, and undertake sampling and analysis of soil, and possibly groundwater, surface water and air.

### Planning Advice Note 33: Development of contaminated land

Extracted vapours are then treated commonly with carbon adsorption before being released into the atmosphere. I am particularly indebted to my advisor, Tim McDaniels, for his guidance and support.

### Leaking Underground Storage Tanks Corrective Action Resources

Brimbank City Council and Yarra City Council identified the need for more proactive compliance activities and have indicated that it is an area of high priority, including increasing resources for these activities. Enforcement actions should act as a deterrent by holding offenders accountable.

## **Managing Contaminated Sites**

Some individuals mentioned all three. In this definition, a contaminated site refers to an area of land in which the soil or any groundwater beneath it, or the water or underlying sediment contains a special waste or another substance in quantities or concentrations exceeding prescribed criteria, standards or conditions British Columbia 1993a. It also regulates contaminated sites owned or managed by entities that it licenses.

### **1**

Participatory approaches also face a powerful and familiar argument; that the laypublic is incapable of understanding and responsibly judging complex risk problems Fischer1991. Figure 1A underscores the complexity of the contaminated sites regulatory framework. The Ministry of Environment has generally taken a scientific and technical approach, which it broadly applies throughout the province.
