Proceedings of the Addiction Health Services Research (AHSR) 2020 Virtual Conference: Part 1

Third, all of the accepted posters were compiled into virtual slideshows, which were shared in between conference sessions. How, and whether, an evidence-based intervention is translated and implemented into routine clinical settings may be the final element of evaluating its evidence base. YP with a substance-related disorder are more likely to have a co-morbid psychiatric illness and are more likely to report a history of trauma than YP without a substance-related disorder Deas.
