### Towards a European research area

There was also a discussion with invited guests and an opportunity for the audience to interact. Participants also stressed the importance of better linking the European Educational Area EEA and the European Research Area ERA. Magda De Carli, Head of Unit, European Commission, Directorate-General for Research and Innovation, European Commission, Belgium.

### Towards a truly reinforced European Research Area

Creating such a HRIC opens new frontiers for research and healthcare via the opportunities for strong international collaborations. This also involved understanding and responding to the impacts of technological advancements and economic interconnectedness with a view to social resilience. Several participants mentioned the Knowledge Exchange Platform as an excellent collaborative initiative, which creates strong links with regional and local actors.

### European Research and Innovation Days

The experience gained in IMI public—private partnership infrastructure projects such as eTRIKS and the European Medical Information Framework EMIF should be leveraged. In this session, four prominent scientists, funded by the ERC, joined forces to shed light on how we can build a more resilient post-pandemic world.

### European Research and Innovation Days

How can regions and cities benefit from its activities? Moreover, the EU ICT industrial ecosystem must be supported in order to alleviate the risks associated with storing and sharing data across cloud systems operated by non-EU companies.

### **Mapping the Higher Education Landscape**

Co-creating the EUROPEAN RESEARCH AREA with the next three presidencies In a pure spirit of partnership between the Commission and the Member States, this session offered an opportunity to get to know more in detail the proposed areas of intervention of the ERA Communication and to discuss with each of the three presidencies on what they focused and to provide feedback on their proposed actions.

### **ERA Portal Austria**

It will support the transition to Open Science, with particular emphasis on Open Access and Open Data European Open Science Cloud — EOSC. All of those projects have developed and implemented worthy ideas that should be included in the HRIC. The manifesto is also open to signature by any other stakeholder.

### **Building a stronger European research area EU2021PT**

At the same time, actions helped tackle social, economic and political inequalities, support human capital development and contribute to a comprehensive European strategy for inclusive growth. Smart Specialisation Strategy are also recognised for harnessing EC funding in enlargement countries. In particular, the EU institutions must ensure swift association of third countries and not endanger existing collaborations across wider Europe and with our close neighbours such as Israel, Norway, Serbia, Switzerland, Turkey, Russia and the United Kingdom.

### **Quantifying progress towards the European Research Area: Alternative indicators of European integration in the field of research**

Researchers have to face differences in the understanding of the right to data protection in those different regional or national European ecosystems.
