K

Interest in existentially closed groups first developed in the 1950s. We determine the structure of the torsion subgroup of existentially closed nilpotent groups of class 2.

Existentially Closed Groups

Interest in existentially closed groups first developed in the 1950s. This book brings together a large number of results proved since then, as well as introducing new ideas, interpretations and proofs. Let K be the class of structures of signature σ that are fields.

Existentially Closed Groups in Specific Classes

From this basis the theory is developed and many of the more recently discovered results are proved and discussed.
