BAYS AND ESTUARIES Shore anglers have access to a variety of fishes living in bays, estuaries, and tidal waters. The more important species are described in a subsequent guide that includes scientific nomenclature, FAO names in English and French where available , local names used in Kenya, diagnostic features, one or more illustrations, maximum size, and notes on fisheries and habitat.

Oregon marine shore fishing

The recreational bottomfish seasons this year in Washington, Oregon and northern California, in fact, will not look that much different from those in recent years. Those caught in Oregon, however, usually measure less than 12 feet. Crankbaits excel for smallmouth bass not only in lakes and reservoirs but also in waters with current, such as rivers.
