During the Park Chung Hee era, the West was synonymous with modernization but also with decadence, moral corruption, and individualism and as such something to be criticized and eliminated.

Saho people

However, the Park regime was determined not to allow these difficult circumstances to interfere with its drive to complete the state-led Five-Year Plan, the economic blueprint for stimulating the national economy, especially the industrial sector. Vulgar and decadent trends in thought were to be eliminated.

Cultures of Yusin : South Korea in the 1970s

A madarre brings forth arguments to his audience and sub-clans or tribes who are involved and tries to win them over.

In Korean the Chinese characters that make up the ishin of Meiji Ishin are pronounced as yusin. Tapping into this interest, real estate agencies took groups of interested clients on weekend expeditions to rural areas likely to have state-subsidized development in the near future.

Saho people

Each is uniquely expressive of the culture of the 1970s, a product of the convergence between the cultural cosmopolitanism of contemporary young intellectuals and the rising tides of dissident social activism that began with the April 19 Student Uprising of 1960. The key factor was their lack of flexibility relative to kye.

Saho people

To the extent that the expressed goal of the Park Chung Hee regime was modernization and capitalization of the South Korean economy, it was

actually the grassroots organizations so despised by the Park regime, like kye, that ironically helped instruct the Korean people in the ways of modern capitalism. The regime issued and reinforced detailed prescriptions about the kinds of activities, and even practices of thought, in which Korean citizens must not indulge. The country house was already a space of fantasy for most Koreans, its spaciousness and modern amenities representing a level of luxury that even those who aspired to become apartment owners could not dream of.

A means of encouraging cohesion within a traditional community, kye were transformed into associations with a primarily economic function in modern times. Their despair is made all the more intensely tangible at the end of the film when they are ejected from the space of the apartment and lose the brief access they had been given to the middle-class stability and modern elegance associated with apartment living during the middle space of the film. The report pointed out three major obstacles to taxation of kye.

Cultures of Yusin : South Korea in the 1970s

By the 1970s, housing shortages and recurrent inflation had reached critical levels as the population density of South Korea grew to become the third highest in the world in 1973.
