NORTHEAST UROLOGIC SURGERY, P.C.

Understanding the relationship between POP and pelvic floor symptoms is a crucial step in the management of patients Maher et al. During catheter withdrawal, if the surgeon meets resistance, the balloon should be allowed to deflate slightly before another attempt is made to withdraw again. You may have blood in your urine or frequent or painful urination for a few days.

Center for Urologic Care of Berks County

We then use each needle to sew along both sides of the vessel walls.

Minimally Invasive Urological Surgery

Attempts to remove thrombi in the venous

system can also be made using a Fogarty venous thrombectomy catheter. An alternative is to complete the anastomosis and just before tying the suture, gently open the clamps distal followed by proximal to allow for expansion of the anastomosis.

Urology Surgery

Men with weak hearts are also good candidates because there is no blood loss.
