Description: Eidos

Linguit's essay details Plotinus' central considerations of the Ideas as contrasted with Iamblichus, Syrianus, Proclus and Damascius, and ends with Proclus' insistence In Parmenides, IV, 910, 24-34 that not only did Plato elaborate formal-paradigmatic, efficient, and final causality better than Aristotle, but he did such first, thus closing a collection that testifies to ongoing refinements in the comprehension of Plato, as well as increased attention to Anglo-American scholarship. This essay takes into consideration discussions arisen in Italy concerning the problem of the so-called «classical metaphysics» and its genesis.

Dans l'ensemble, cet ouvrage est d'une grande valeur, plusieurs contributions suscitant un réel intérêt. Passé ce détail, ce recueil contient des contributions de qualité sur la théorie platonicienne des Idées et sur les débats qu'elle soulève: sur sa signification, ses raisons, son évolution et sa réception.
